

WE PROVIDE NDT SOLUTIONS

Scan welds and map corrosion with JIREH's automated and manual scanners. We build equipment to help you perform repeatable and efficient inspections for every UT application.

■ ROTIX HIGH TEMPERATURE INSPECTION

Inspect surfaces with temperatures up to 350°C (662°F).

■ CIRC-IT DUAL PROBE WELD SCANNER

Incredibly small diameter scanner with amazing low-profile clearance.

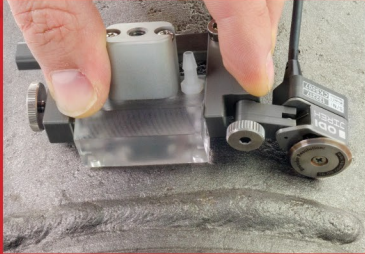

■ NAVIC AUTOMATED SCANNING

Modular, motorized, steerable and ready to tackle any application.
